FNZ

Analyst Developer (m/w/d)

Munich | Full-time employee | ab sofort

About FNZ

FNZ is a global FinTech company dedicated to helping people achieve their financial goals. FNZ partners with the world's leading financial institutions to help them offer optimal investment products to their end customers. FNZ partners use FNZ platform technology to improve product selection & transparency and reduce costs. All of this forms the basis for FNZ's tremendous growth story.

The FNZ offers cover a wide spectrum, from company pension plans to retail banking and business with (very) wealthy customers. Currently, assets of more than one trillion USD are managed on FNZ platforms by several million customers worldwide. More than 4,000 employees in the FNZ Group ensure the best possible cooperation with some of the world's largest financial institutions. Today, over 100 financial service providers in the UK, Europe, Asia, Australia and New Zealand rely on FNZ on a daily basis.

Your Tasks:

- Analyse required system changes, design databases, write complex financial business logic and create slick web applications
- Working closely with analyst testers and other members of the project team to produce world class software
- Assist the analyst tester in the creation of user story definitions and acceptance criteria, and work within the constraints of the feature/user story to define the underlying detail of the required changes
- Interpret complex financial business requirements, design and build the highly intuitive user interface and interactive financial tools, and develop real-time transaction processing systems
- Provide solutions and recommendations for the resolution of technical issues, help design and build APIs and external system interfaces, adhere to the defined procedures for code management, code reviews, coding standards, naming conventions and security standards
- Write automated unit tests for any newly created code, and perform manual unit testing to ensure any changes made to the system are of a high standard and the system hasn't regressed
- Keep abreast of latest and/or relevant technologies, tools and methods, identify adoption of technology, tools and methods best suited to FNZ, proactively resolve technical (environmental,

coding and testing) issues, create novel solutions to problems by incorporating cutting edge technology or generic concepts

Your Qualifications:

- Academic / Technical degree in Computer Science or equivalent education
- Confident, and able to take initiative in a delivery-focused environment
- Independent, self-directing working style and ability to learn quickly in a dynamic fast-paced industry
- Hard-working, innovative and take pride in your work
- Passionate about creating innovative solutions for customers
- Some experience with one or many programming languages and experience with Microsoft development products (C#, ASP.NET is desired)

We offer:

- Modern office space with good transport connections in Munich and the possibility to work remotely
- Be part of a highly successful, rapidly growing, global business that is leading the delivery of financial services via cloud computing and partners with some of the world's largest companies
- Significant financial rewards for high performing individuals
- Global career opportunities for our best employees at any of our offices in the UK, Czech Republic, Germany, Australia, New Zealand or China
